USER EXPERIENCE LEAD - AI EXPERIENCES | ENTERPRISE TOOLS | ENGINEERING SOFTWARE | B2C TECHNOLOGY

Location: Chennai, Bangalore • Phone: +919962755711 • Email: geetanjali@gmail.com • Portfolio: <https://geetanjali.com/>

PROFILE

Strategic UX designer with 9 years of experience designing digital products across complex B2B, technical and consumer facing environments. Expertise in product strategy, user research, interaction design and systems thinking, with a focus on translating challenges into clear product direction, intuitive experiences and scalable design solutions, while strongly understanding technical constraints and business strategy. Skilled in cross-functional collaboration, establishing partnership with product owners and development teams, and aligning with leadership to drive product outcomes, business value and growth.

EXPERIENCE

Senior Specialist, UX Strategy & Design

Feb 2023 – Present | Infineon Technologies India Pvt Ltd

- Owned and led end-to-end UX lifecycle from discovery and design to developer handoff and delivery of the Infineon Developer Community, collaborating with stakeholders, product managers and engineering teams to understand business priorities and constraints and drive product roadmap, resulting in a **67% increase in engagement** post release.
- Strategized and directed the design of **15+ 0->1 customer facing platforms and internal applications** spanning websites, webapps, softwares and mobile apps, with a focus on improving continuity between touchpoints in the user journey, influencing at the ecosystem level.
- Recognized by the office of the CDSO and won the SPIRIT award** for identifying the market gaps and proposing a solution that aimed at substantially improving customer satisfaction (CSAT) score and achieving business KPIs.
- Facilitated cross-team alignment through workshops, design critics and newsletter communication, acting as a **single point of contact** between centralized and divisional teams, including Greater China team, hiring talent to handle growing volume of requirements.
- Integrated intelligence into the user journey by ideating and designing **AI-powered experiences** that significantly improved the Customer Effort Score (CES), with the AI conversational assistant recording **44K users within a month of launch**.

Design System Architect

Sep 2021 – Dec 2022 | Khoros R&D India Ltd

- Identified recurring patterns across Khoros customer relationship management, support, marketing and analytics product portfolio, created a UI inventory to record variations and **established leadership alignment** to create a unified design system which aimed at giving product teams a standard, structured and scalable way to build products, reducing unnecessary complexity of repeated building of components.
- Collaborated with 2 other UX designers to create the design library, taking **ownership of the modules and pattern templates** with a total of 50+ modules and patterns created.
- Defined documentation standards** and governance processes for intuitive global understanding and adoption of the design system – including setting up of the Figma file structure and Storybook files for connectivity between design and engineering.

Product Designer

Jun 2017 – Aug 2021 | Multiple companies (Freelance)

- Led discovery, ideation, wireframing, prototyping and validation activities for **multiple unicorn startups and scaleups across industries** namely Ecommerce and retail (Ounass, Picnic), Enterprise SaaS (Wafeq, Lokalise, Innspire), Fintech & Payments infrastructure (Nymcard, Circit, Mamo), Foodtech (Kitopi), Healthcare (Nabta Health, Hiwell) spanning the EMEA region.
- Worked directly with stakeholders to understand business objectives and translated them into simplified workflows that reduced user and operational complexities, while adapting to varying business domains in parallel.
- A notable project ReviewMagic **achieved 1746 customer sign ups and a 43% conversion rate** within the first 3 months, leading to it being awarded the "Most Innovative Hospitality Technology Award" by HTNG's prestigious **TechOvation awards**.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science Engineering

Aug 2017 – May 2021 | Anna University Chennai

COMPETENCIES

UX Strategy • Product Design • Interaction Design • Design Systems • Design Governance • User Research • Information Architecture
Journey Mapping • User Journey Optimization • Workshop Facilitation • AI-assisted UX • Enterprise UX • Stakeholder management

TOOLS

Figma • FigJam • Figma Make • Photoshop • Illustrator • Jira • Confluence • Microsoft Office • Adobe XD • Framer • ClaudeCode • Lovable
